

AF-706S

Updated model with more forgiveness,
longer distance, improved feel and sound

New internal design lowers
the center of gravity on #5-PW

⇒ The lowered CG provides higher launch angle and
longer carry distance on #5-PW

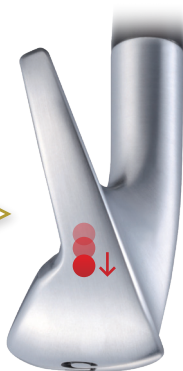

Carry comparison to AF-706

Average carry distance (#5-PW)
+ approx. **3**yd

*Based on our robot testing

Compared
with
AF-706
Approx. **3%**
Lower

*Comparison on
avg. CG height
on #5-PW

Finetuned face thickness on TW-SW
improves sound & feel
while maintaining the distance

↓
Sound and feel harmonized and
improved throughout the set
