

Features

Tour Wedge [Non-plating]

MUKU / KURO

Tour Wedge Series Non-plated ver.

Feel Forged Mild-Iron Material

The surface without the plating layer
directly delivers the soft feel of mild-iron (S20C)

* KURO has a oxide layer which is much thinner than
a nickel-chrome plating layer.

Improve Concentration

The non-plated finish reduces glare at address

More Shot Stability

Unique Change on Surface Texture

The surface texture changes over time

MUKU produces more distinct surface changes
KURO looks smaller due to its color effect

Feature Comparison

		Soft Feel	Rust Resistance	Less Glare
	STD. (Ni-Cr plating)	○	○	○
	MUKU (Non-plating, Raw)	◎	×	◎
	KURO (Non-plating, Black-oxide)	◎	△	◎
