

Features

S:R LD Iron

EPON's First Ladies' Iron Engineered for Maximum Distance

Any-C System designed for maximum distance

A longer section of the shaft enhances dynamic energy

Approx. 1 inch
Longer Flex Length

Increased head speed delivers
GREATER DISTANCE

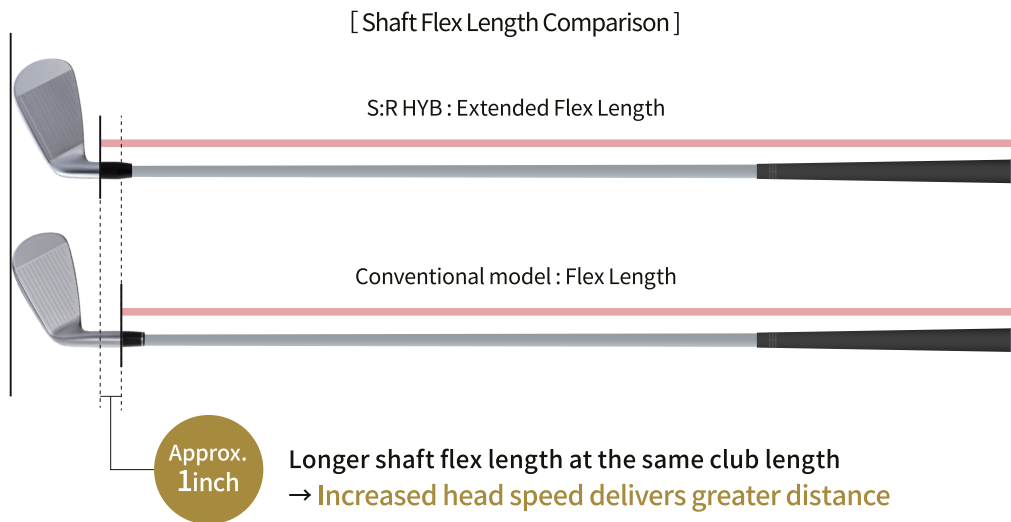

Any-C System: Advanced Construction for Explosive Distance

The shaft is free to bend without the hosel

< The hosel bonding area - once rigid in conventional models - is now designed to flex >

The specialized sleeve and lock nut enable deeper shaft insertion into the lower section of the head
→ Lowered hosel bonding area without upper hosel section

CG design engineered for enhanced draw bias and higher launch

Positioning the center of gravity as low and deep as possible
→ Promotes natural face closure and higher launch conditions

Expanded Sweet Spot

An increased CG depth maintains draw bias even with a longer CG distance
→ Allowing a longer CG distance design
→ **Resulting in an exceptionally wide sweet spot and enhanced forgiveness on off-center hits**
→ **Delivering consistent, targeted distance performance**

[OPTION]

Head Weight Adjustment

These weight screws can be replaced with lighter or heavier ones to achieve the head weight that you prefer : +4g -2g (2g increment)

The diagram shows a golf club head on the left. To its right are four weight screws arranged in two rows. A double-headed arrow is between the two rows. The top row has two Tungsten screws: 8g (left) and 6g (right). The bottom row has two screws: Stainless (STD) 4g (left) and Titanium 2g (right).

*The 10g tungsten screw is not compatible with this product due to its design specifications.

*Specialized tools and adhesive are required for weight replacement.

*For weight replacement requests, please contact an authorized EPON GOLF dealer.

*Any damage or malfunction resulting from weight replacement is not covered under warranty.

S:R Series Club Setting

Simple, intuitive numbering with a performance-driven setup
— free from traditional loft and length flow.

	Driver	HYB				Iron						
No.	#1	#2	#3	#4	#5	#6	#7	#8	#9	PW	AW	SW
Loft(°)	12.5	17	19	21	23	26	29	33	38	43	49	56
